

The Woodbridge Township School District is comprised of 25 schools plus an administration building. Each of these locations consumes a great deal of electricity each day. Our district-wide electricity bills average \$80,000 per MONTH! As part of a global society, it is incumbent upon us to try to conserve our planetary resources for future generations. As a school district, it is our responsibility to teach our students to conserve energy; and it is our duty to our taxpayers to save money where we can.

Beginning December 1, 2017, the Woodbridge Township School District will launch a conservation campaign called, "If it's not in use, turn off the juice!" We will emphasize resource savings practices at each school, such as: 1) turn off lights when not in use, 2) turn off computer monitor screens each evening, and 3) unplug chargers when not in use.

It is our goal to work together to reduce our consumption of resources.

**So if it's not in use, turn off the juice!**
